

trinamiX GmbH receives ISO certification for its quality management system

Ludwigshafen, September 28, 2018 - trinamiX GmbH has received the DIN EN ISO 9001:2015 certificate for the development, production and sales of optical sensor systems by the independent testing and certification body of TÜV Hessen. The quality management standard ISO 9001 is the most widely used and most important standard in quality management, both nationally and internationally. Dr. Ingmar Bruder, Managing Director of trinamiX GmbH: „We are very proud of this certificate. It is a proof of the commitment and high standards we place on ourselves and our products.“

To obtain the certification according to DIN ISO 9001: 2015, trinamiX presented a comprehensive quality management process. From product development through relationship management to customer-oriented, continuous optimization, all work steps are described. In addition, efficient workflows, transparency, and clear responsibilities within the company were key to obtaining the certification. The audit team were particularly impressed by the very constructive and innovative communication in the company.

“Our goal is high quality products and satisfied customers. The audit and the preparation for it helped us to align our processes even more consistently to this goal and firmly anchor our quality management processes in the company”, explains Dr. Wilfried Hermes, quality management representative of trinamiX.
