

# trinamiX technology provides secure face authentication behind OLED

trinamiX

A brand of  
BASF – We create chemistry

Powerful combination of design, security and speed for unlock and mobile payment

Used for convenience face authentication solutions, **limited security, not qualified for mobile payment services**

**High security** for face authentication, but introduced the disliked **notch** in the display

New **design freedom**: displays without notches or holes

- **Freedom in display design**
- **New level of security**
- **Excellent user-experience**
